

DreamHack Prize money policy

All prize money will be paid in the Swedish currency SEK, EUR or in USD, depending on the tournament and/or competition that you have competed in.

The prize money is only exempted from tax and social fees if your winning team is organized as a company/association or a non-profit organization, see page two.

If you are none of the above, and you want to claim your prize money as a private individual, see page three if your residing outside of Sweden

If you are a Swedish resident. See the following information and page four

If you are claiming your prize money as a private individual, per Swedish law, you have to pay social fees and taxes since you will be receiving your prize money as a form of salary.

For team-based games, all team members are responsible for claiming their share of the prize if claimed as a private person. This is to avoid problems if in some way you leave your team, or the team is disbanded

Prize money will be processed in the order they come in.

Prize money will be paid 90 days after closing of event or after 60 days if we get your claim within 30days after event
